A: The text looks like code for a programming language. It isn't actually human-readable though; it looks like some sort of

text code. You can use one of the online translators (like to see what it says. Alternatively, if you want to keep it for yourself, you can use online translators. A: Looks like some sort of binary/hex data. in hex, then click the button below Q: Convert seconds to string How do I get the current seconds and convert them to string like 01:13:24. The code below does not work.

```
Dim startTime As Double =  
Cdbl(txtTimeStart.Text) Dim endTime As  
Double = Cdbl(txtTimeEnd.Text) Dim Seconds  
As Double = endTime - startTime Dim minutes  
As Double = Seconds / ( 2d92ce491b
```
