who has tried to use a software application on a Windows 10 device will tell you that it is not easy to use the software after Microsoft's decision to put its own apps on top of the desktops of their users. They found it a bit confusing to use other apps or see the menu options on top when they should be clicking and scrolling through the operating system to find what they want. This limitation is going to last for a while because of the

new 'Microsoft Windows' as the new look of the operating system. The decision to put 'Microsoft Windows' on the desktop, which is its own version of the operating system, removes the ability to hide the menu options for apps as is possible in macOS. This means that it is a challenge for software providers like AutoCAD to make their software compatible with the Windows 10 operating system. This is one of the

major reasons why Autodesk did not update their previous version of AutoCAD to Windows 10, and they chose to get their users to update their computers. Autodesk did release a new version of AutoCAD 2017 and that was designed to work with Windows 10

KeygenBig "Buck" Brown, a former U.S. Army captain and retired Navy rear admiral, was recently honored for a career that spanned four decades of military service and included positions as senior officer, high-ranking general and senior Pentagon adviser. A military non-combatant, Brown was a renowned POW/MIA negotiator for more than 25 years. He was instrumental in the release of many U.S. prisoners and American

hostages of the Communist People's Army of Vietnam (PAVN). Awareness of missing Americans is a military veteran's passion. "Buck" was named "International Van, Boat and Aircraft Search & Recovery Person of the Year" in 2013 by the U.S. Department of Defense (DOD). He is the only non-military "Person of the Year." Brown has dedicated his life to his work, whether with the POW/MIA community, or with
