.include Q: Django - How to make the page not go blank when home page is reached So I have a website which shows a list of people that are registered (who have also logged in) and a section for 'Edit info' and 'Sign up'. When a user goes to localhost, it will go straight to the home page and then it will display the list of people. When a user is on any page besides the home page, it will go to the edit page, signup page or any other page. When a user is on the home page, it will go to the 'edit info' page. When a user is on the 'edit info' page, it will go to the 'sign up' page. How do I make it so that when a user goes to the home page, they will go to the 'Edit info' page instead of going blank? When the user gets to 'Edit info' page, it will go to the 'sign up' page. When the user gets to 'sign up' page, it will go to the 'home' page. EDIT When I tried to do what you
