Easy Hot Key

With an almost self-explanatory name, Easy Hot Key is a simple yet efficient piece of software that provides you with extended lists of actions and an easy way to associate hotkeys for each of them. Easy to install and even easier to get along with The app undergoes a streamlined installation process and upon first launching it, you are met by a compact main window with a functional black-themed user interface. Associating hotkeys for various actions is by no means a difficult task, as you only need to click the designated plus-shaped button, define the actual keyboard combination and select the action. Offers the possibility of adding shortcuts to a wide array of actions That said, you should know that the app enables you to set hotkeys for the following actions: close all windows, access the display settings window, control audio/video playback, hide individual windows, access Window's default date and time feature and even execute some command line entries. Besides this, you can also open any browser via specified shortcuts, access its primary controls, open websites and even search the Internet by opening windows for Google, Amazon, eBay, Wikipedia and YouTube, just to name a few. Easy Hot Key is also rather competent when it comes to basic computer tasks, opening the Control Panel, inserting texts, logging off and rebooting the computer, as well as for shutting down Windows. Key combinations and hotkey for advanced actions All in all, Easy Hot Key is a simplistic app that aims to improve your workflow by providing you an user-friendly environment and a quick way to assign keyboard shortcuts for some simple or advanced actions. Slow down your Internet connection. When you're online, your bandwidth is being shared by all other people connected to the Internet. The average broadband connection speeds are around 10 Mbit/s. On a fast connection, you get 50-80 Mbit/s. [Sure, Speed Booster is free. But if you take advantage of all its power-saving features, it's also the most effective program to secure the maximum performance out of your Internet connection.] Speed Booster doesn't only protect your computer from future losses of speed, it will also save you money. If you don't take full advantage of your connection, your ISP will charge more for your data usage. And when the connection is full, your ISP will start restricting the amount of data you can download and upload. Speed Booster reduces your bandwidth consumption by up to 80% and
